We have been chosen by Carlos Moreira , Head of the United Nations TradePoint Development Centre (UNTPDC) of UNCTAD to be the Official Publication of the United Nations Conference on Secure Infrastructure for Electronic commerce , Oct 30th and 31st in Melbourne Australia. We wish Carlos , a regular contributor , good luck on this timely Conference.

We have a good cross section of articles both from a organizational, regional and subject matter. For example there are excellent articles from the OECD, India and banking. More of all three will be added in the future edition in January 98.

We have numerous new contributors as well as our regular contributors - most of whom have been with us since our first edition - almost two years ago. To our regulars - a thank you. To our new one contributors - welcome. And to our readers- enjoy.
